PROFESSIONAL SUMMARY

MERN Stack Developer with 3+ years of professional experience at Cognizant Technology Solutions, specializing in building, supporting, and scaling web applications. Strong expertise in React.js, Node.js, Express.js, and MongoDB, with hands-on experience in REST API development, authentication, and CRUD operations. Proven ability to build responsive user interfaces, integrate secure payment gateways, and deploy applications using modern tools and cloud platforms. Seeking a full-time MERN Stack Developer role to deliver high-quality, user-centric solutions.

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions   *Sep 2022 - Present*
Frontend Engineer - E-Commerce Platform (Darden DP Support and ME)

• Optimized a large-scale E-Commerce platform supporting 1000+ food delivery websites for Darden Restaurants.

• Developed and supported frontend components using JavaScript, React.js, HTML, and CSS for online ordering, catering delivery, and reservation features across desktop and mobile platforms.

• Resolved daily production issues including UI defects, content updates, menu and payment-related issues, ensuring smooth customer experience.

• Implemented menu updates, special hours requests, menu bundle setups, and global banner configurations during peak business days.

• Contributed to a 25%+ revenue increase by adding and configuring a new menu category during peak days.

• Provided UI validation and frontend support during high-traffic periods to ensure system stability and performance.

• Received client appreciation for quick learning of the system, effective issue resolution, and support during critical peak-day operations.

Cognizant Technology Solutions   *Feb 2022 - Aug 2022*
Full Stack Java Intern

• Completed a 6-month Full Stack Java internship with hands-on training in Core Java, SQL, HTML, CSS, JavaScript, and basic Spring concepts.

• Gained practical exposure to SDLC, Agile methodologies, debugging, and code reviews. Collaborated with mentors and team members to understand enterprise-level application workflows.

PROJECTS

VSpace – Online Clothing E-Commerce Application   *Aug 2025 - Oct 2025*
Tools: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Node.js, Express.js, MongoDB, Git, GitHub, Vercel   [View Project]

• Developed a responsive e-commerce web application using React.js, Tailwind CSS, HTML5, and JavaScript for product listing, cart, and checkout functionality.

• Built RESTful backend APIs using Node.js and Express.js and integrated MongoDB for managing products, users, and orders with full CRUD operations.

• Implemented user authentication and authorization using Firebase Authentication to ensure secure access.

• Integrated Razorpay payment gateway to enable secure and seamless online payments.

• Enabled frontend–backend communication through REST APIs to ensure smooth data flow and application performance.

• Deployed the application on Vercel and managed version control using Git and GitHub.
